

PRODUCT PROFILE

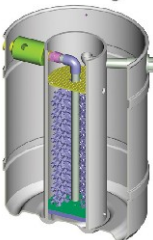

Zebra® Muscle™ Coalescer Triple Action Coolant Cleaner

- Remove tramp oil and prevent static sump rancidity
- Permanent coalescing media accelerates oil collection
- Oil concentration option drains oil efficiently
- Particle filtration option removes degrading chips
- Multiple pump options to suit any application
- Multiple oil intake attachments to suit any application
- Oxygenator™ aerates to prevent bacterial growth
- Leak-proof fittings keep you shop cleaner
- Durable, crush-resistant hoses can be customized
- Clean coolant returns to sump by gravity
- Built-in siphon empties barrel in minutes
- One year warranty

Plus model (F15P)

- Great for readily-separating oil
- Very low maintenance
- Drum dolly ordered separately

Flexor™ model (F16)

- Internally similar to the Plus
- Concentrates oil for efficient draining
- Provides clean fluid surface for monitoring
- Low maintenance
- Aerates automatically
- Drum dolly ordered separately

Deluxe with Filter model (F15DF)

- Best for oils taking a few minutes to separate
- Filters coolant-degrading chips (Al and Fe)
- Filters suspended chips that wear tooling
- 100µ bag standard, other sizes available
- Maintenance of filter bag as needed
- Drum dolly included

Muscle using air diaphragm pump.

Intake Attachments

Sumpster

Floating Sumpster

Hammerhead

Recept

Refer to Intake Attachment literature for details

Pump Options:

- 115v submersible
- 230v submersible
- Air diaphragm, external
 - Best for heavy chip loads
 - Best for lifts of more than 4'

How to Specify Your Muscle

Base Model	Intake	Pump
F15P F15DF F16	R = Recept S = Sumpster H = Hammerhead F = Floating Sumpster	1 = 110v 2 = 220v 3 = Air Diaphragm

Example Specification: **F15DF.R3**
