Zebra Oxygenator™ / Aerator, Circulation Pumps, and Odor Control Tablets

Zebra Oxygenator

- Extend coolant life
- Eliminate foul odors
- Maintain high oxygen levels
- Industrial-grade bronze air diffuser
- Fuel-grade tubing

In the absence of oxygen, anaerobes multiply, causing coolant to spoil. Injecting oxygen into the coolant inhibits anaerobic bacterial growth, extending coolant life. Air-operated models also available. Contact us for details.

Circulation Pumps

- Coolant lasts longer with continuous circulation
- Ideal for sumps or tanks over 100 gallons
- Low cost and small size

Like a pond, coolant stays healthier longer if it circulates. Don’t shut down your coolant sump or your central tank! Use a circulation pump to keep your fluids moving and you’ll waste less coolant.

Zebra Odor Control Tablets

- Safe and easy-to-use
- Eliminates sump odors caused by hydrogen sulfide bacterial emissions
- Most effective way to control sump odor
- Contains no formaldehyde or harmful chemicals
- Safer and more economical than biocides
- Works best when used with Zebra Oxygenator
