Zebra Skimmers, B Series Belt Skimmer Line, To Include Longer Reach Belts

Cleveland, OH---Zebra Skimmers Corporation, a full-line manufacturer of oil skimmers and coolant maintenance equipment, recently introduced its B Series Belt Skimmer line to include longer reach belts.

"Our B Series belt skimmer line was previously standard with a fixed lower pulley which was inappropriate for long reach belts. Due to increased demand for an economical solution for deep applications, we designed a hanging pulley system to fit with the upper body of the series. This series still fits a 1" wide, polyurethane or stainless steel belt, but now can reach up to 15'. The design also allows for retrofit of existing B Series units already in the field," remarks Meg Grant, Inside Sales & Service.

Zebra Skimmers, the leader in coolant maintenance for over a decade, invents new technology to save its customers money on coolant while reducing waste, and sells and supports its equipment worldwide. Most products are guaranteed for at least a year, and some for life.
