METALWORKING FLUID ANALYTICAL LAB SERVICES

Cleveland, OH---Zebra Skimmers Corporation, a full-line manufacturer of oil skimmers and coolant maintenance equipment, recently introduced its metalworking fluid analytical lab services.

"We wish to serve our customers better, helping them to analyze their metalworking fluids, as they may have little time or resources. Testing will indicate where there may be current, and even upcoming, fluid issues. Our customers can then take action steps to prevent premature chemical breakdown, saving costs for machine cleaning and coolant recharge and disposal," says Mike Grivna, Business Development Manager.

NEW Analytical Services include:

- ✘ *Concentration*
- ✘ *pH*
- ✘ *Hardness*
- ✘ *Tramp Oil & Total Oil*
- ✘ *Biological Count (bacteria, fungus, mold)*
- ✘ *Suspended & Dissolved Solids*

Zebra Skimmers, the leader in coolant maintenance for over a decade, invents new technology to save its customers money on coolant while reducing waste, and sells and supports its equipment worldwide. Most products are guaranteed for at least a year, and some for life.
